MISSION STATEMENT

Adnet's mission is to be a company of choice for superior customer satisfaction in providing IT services in long term relationships with clients by applying and continually improving industry best practices (CMMI, ISO, ITIL & Six Sigma) to increase productivity and improve quality with the help of highly qualified employees dedicated to customer satisfaction.

Adnet, Inc. is a standard-based process-driven customer-focused professional services company, delivering mission critical information technology solutions and services which enhance the mission capabilities of the federal government. The Company delivers performance-driven solutions that improve organizational processes and support business goals and objectives.

Adnet has developed an impeccable team of SMEs who follow best practices from PMBOK, CMMI-SEI, ISO 9001:2008, ISO 20000, ITIL management and Six Sigma

frameworks. We use of methodologies like Earned Value Management, Risk Management, Security Management, Bidirectional Traceability Matrix, Work Breakdown Structure and Agile SDLC. IBM Rational or client provided tools make Adnet services highly efficient.

With proven process-based management practices, aligned with customer goals and performance targets, Adnet continually improves performance to deliver high quality products and services on time and within budget while maintaining the highest customer satisfaction.
